1. When selecting a forms-based application [Accounts Receivable, General Ledger, Oracle Assets, CAPs, Cash Management (CMRA), Chart Security Maintenance Application (CSMA), the Oracle Online Security Form used by Authorized Requestors and Accounts Payable], the user will be prompted to accept the JRE version:

![Warning message](image1.png)

2. Click in the yellow band and accept the update. You will then receive the following warning:

![Security warning](image2.png)
3. The Welcome to Java screen appears; click Install:

4. The Java setup will run:
3 Billion Devices Run Java

Computers, Printers, Routers, Cell Phones, BlackBerry, Kindle, Parking Meters, Public Transportation Passes, ATMs, Credit Cards, Home Security Systems, Cable Boxes, TVs...
Some Java security prompts have been hidden when you selected the 'Don't show this again' option. You can improve the security of your personal information by restoring these prompts every 30 days.

More information
☑️ Restore Java security prompts
5. You will receive the Java complete message; click Close.
6. You will be brought to the Java Verification Screen. Click Agree and Continue:
7. You will receive the security information screen, click run
If all goes well you will see the following screen:

Java Versions on Your Computer

Congratulations!
You have the recommended Java installed
Version 7 Update 55

No out-of-date versions of Java were found.

Return to the Java.com home page.
8. It is possible that you will then see the Java screen informing you that a newer version is available. **Close down the browser and do not accept the newer version.**

9. Return to Oracle and click on the application again. The regular screens will open. You may receive the following message: **[NOTE: Not ALL users will receive this message; it is dependent on IE browser settings]**

10. Users should click off the Do not ask again until the next update is available dialog box and click Later.
11. You will then see this message:

![Security Warning]

12. On this screen:

A. Select the checkbox that says I accept the risk and want to run this application.

B. Click Run

ROLLING BACK TO THE PREVIOUS VERSION

If you inadvertently upgraded to Version 1.7.0_60, use the instructions found in the JRE Troubleshooting Guide to revert back to Version 1.7.0_55.
Please Note:

Users should be aware that upon logging into Oracle for the very first time you will be prompted to install Java JRE version 1.7.0_55. This approved update should be allowed. If you see a pop up message that a later Java version is available, please DO NOT act upon the request. Users should not attempt to install anything higher than the Java 1.7.0_55 version. Please contact the helpdesk 6-2001 with any questions.

Users should also note after subsequent logins, a Security Warning Pop up will occur, when attempting to open a form within Oracle Financials. You will see a question, 'Do you want to run this application? Publisher: Unknown'. Please Select the box below, 'I accept the risk and want to run this application', then click Run to start the application. We are working to remove this pop up and will communicate once we have accomplished this.
